The Laser Microbeam and Medical Program’s (LAMMP) Biophotonics Summer Undergraduate Program (B-SURP) at the Beckman Laser Institute and Medical Clinic (BLIMC) provides undergraduate and high school students with a 9-week immersion experience in Biophotonics, Biomedical Optics, and Medical Translational Technology.

Benefits Include:
• Stipend of up to $3,000
• Seminars on biophotonics and biomedical optics
• Professional development workshops
• Faculty mentoring
• Access to state-of-the-art facilities at UCI
• B-SURP Symposium
• Post-program support

Who Should Apply?
Applicants should be highly motivated and high-achieving science and engineering majors. They must be non-graduating students from universities or community colleges or high school students, be U.S. citizens or permanent residents, and have health insurance coverage.

This program is committed to promoting diversity within the field of science. Women, underrepresented minorities, individuals from economically and socially disadvantaged backgrounds, and persons with disabilities are especially encouraged to apply.
