Summer 2006

Application Deadline:
March 13, 2006

Program Dates:
June 25-September 2, 2006

The IM-SURE Program at the University of California, Irvine, provides a unique 10-week summer research opportunity for undergraduates to become fully immersed in cutting-edge research in the fields of biomedical, physical and engineering micro/nano-technology.

Benefits Include:

- \$3,000 Stipend
- On-campus housing
- Travel reimbursement
- Micro/nano technology seminars
- Professional development workshops
- Faculty mentoring
- Local industry field trips
- Unique UCI Library privileges
- Weekend trips and social activities to experience Southern California
- Post-program support

Who Should Apply?

Applicants should be highly motivated and high-achieving, non-graduating science and engineering majors with junior or senior standing by the start of the program. Applicants must be attending a four-year university after the program, be US citizens or permanent residents, and have health insurance coverage.

This program is committed to promoting diversity within the fields of science and engineering. Women, underrepresented minorities, and individuals from economically and socially disadvantaged backgrounds are especially encouraged to apply.
